Yearly Economic Review

Year 2025, Year of sustainable trade

- Description: A massive wave of transnational protests operating under the umbrella of "Trade4FutureGenerations", has gained momentum on the international scene. The organisation encompasses private and public initiatives led by individuals and companies, aiming to pressure governments into adopting more sustainable trade practices. Against the backdrop of increasing poverty and inequality resulting from international tensions, sanctions, and lack of cooperation, a reform of the current system is imminent.
- As a result of International dynamics, the following measures were taken, affecting countries' National Wealth Indicators:

Country	National Wealth Indicator
Brazil	37,000
Canada	28,500
EU	224,000
India	19,000
Japan	67,000
Mexico	12,500
